- NOTE:**
1. Each output can provide up to maximum load, but total load can not exceed rated output power.
 2. Line regulation is measured from low input voltage to high input voltage at rated load.
 3. Load regulation is measured from 20% to 100% of rated load at 110VAC input. (Redundant function Spec add 0.6V)
 4. Ripple & Noise is measured by using a 0.1uF/630V metalized capacitor & a 47uF electrolytic capacitor parallel with the test point, at rated load and at 110VAC input.
 5. Efficiency is measured at rated load and at 110VAC input.
 6. Hold-up time is measured at rated load and at 110VAC input.
